

**TitanPad** is a nice, real time, online document editing and collaboration tool that helps you quickly collaborate on text documents with your team. You can import text file, HTML, Word, or RTF file formats. Also, you can download the document in a variety of formats, such as HTML, Plain text or Microsoft word!

What is Zaption? As we flip our classrooms, we make videos for our students! [Zaption](#) has created a platform where teachers can add questions, pictures, diagrams, links to related websites, and other materials to ensure student are learning from video. If you are interested in finding out more about making Interactive Educational Videos with Zaption, then sign up for the webinar: Tuesday, November 17, 2015 @ 5:00 pm - 6:00 pm EST

**Padlet is a collaborative online bulletin board! Learn how to use padlet in your classroom!**

**Google Docs**, Sheets, and Slides are productivity apps that let you create different kinds of online documents, work on them in real time with other people, and store them in your Google Drive online — all for free. You can access the documents, spreadsheets, and presentations you create from any computer, anywhere in the world.

**ViewPure** - All the great YouTube video goodness minus all the ads and links. Paste your YouTube URL in the box provided. You will see the YouTube video show in the window without adds taking up the screen.

If you want to start the video at a specific place; right click on the white ball that moves along the timeline bar while the video is playing and select "Copy video URL at the current time". Paste that URL as a link in your document; or Power Point, it will take you to YouTube and start the video at the point you selected. You can also link from BlackBoard to ViewPure, TubeChop or YouTube.

Videos will also play from within Blackboard. Remember when using these tools; if the video goes away on YouTube— the link will no longer work! <http://viewpure.com/>
