

## A few ways to capture/edit video!

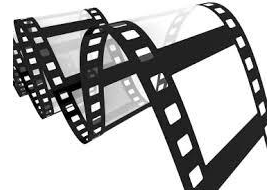

### Blackboard — Embed Video

You can embed video into BlackBoard. You don't have to load video files into the Content collection folder! BlackBoard has the new "mashup" tool. Click on the BlackBoard Learn videos on the web page – left side to learn more!

### TubeChop — Crop Video

Once a video is selected, click the "Chop" button. Select the part you want by dragging the two black sliders that appear under the video to choose the desired start and end times of your chopped piece. If YouTube is blocked, TubeChop videos will not show, since they are "pulled" from YouTube.

### YouTube — Start Video at a set time/location

Play your video to the desired start time. Right click directly on the video screen and select COPY VIDEO URL AT THE CURRENT TIME. You can paste that link into e-Campus; power point, a word document or email. The link will launch youtube and start your selected video at the desired time.

**Freemake** - offers high quality freeware to millions of users worldwide since 2010. Safe & reliable free software without registration, time limitations, or hidden costs. Download and use the free Video Converter, Video Downloader, YouTube Converter, Audio Converter and Free Music Player! (Great if teleworking – home use only).

**Camtasia** - **Screen Recording & Video Editing** - A powerful, yet easy-to-use screen recorder, Camtasia helps you create more professional videos without having to be a video pro. Easily record your screen movements and actions, or import HD video from a camera or other source.

## A few ways to capture/edit video!

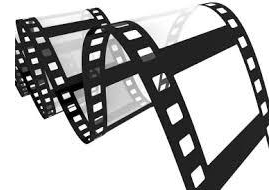

### **EdPuzzle** – Enhances Video – upload existing videos or one of your own!

#### **Engage students easily**

Enable self-paced learning with interactive lessons, add your voice and questions along with the video.

#### **Reinforce accountability**

Know if your students are watching your videos, how many times and see the answers they give.

### **Educannon** – Upload video – make a lesson

eduCanon is an online learning environment to create and share interactive video lessons. Begin with any YouTube, Vimeo, or TeacherTube video content (screencasts, Khan Academy, Minute Physics, TED, NOVA, etc.) and transform what is traditionally passive content into an active experience. By time-linking activities that students engage with as the video progresses the content is segmented into digestible components. Awarded the "best open educational resource", eduCanon is designed for K-corporate, flipped, and blended environments.

### **Zaption** - Create engaging video lessons in minutes

Find high quality videos on any topic. Browse the gallery for great ready-to-use lessons. Add images, text, and questions to any online video, creating interactive lessons that meet your learners' needs.

The above software makes a “copy” of the video you upload, if it goes away on YouTube; it **stays** in the software. You have to link to these sites and log-in to access your videos; they are **not downloadable** to use in BlackBoard or other packages.
