GOOGLE ..

Have you ever googled something and gotten results you have to filter through going back decades?

Well, Google has announced a new search bar command that enables users to filter results for a desired date range.

The "before:YYYY-MM-DD" and "after:YYYY-MM-DD" shortcuts yield results for before, after, and within the dates specified.

To get results after a given date, add "after:YYYY-MM-DD" at the end of your search. For example, searching "top 10 movies after:2018-12-31" will provide you with results that were published in 2019 and onward!

Using Kirkpatrick to Evaluate the Newest Tech-Based Training

Jim Kirkpatrick, Ph.D.

Date and Time: Thu, Feb 28, 2019 at 9AM Pacific / 12PM Eastern
Description
Training is becoming increasingly tech-based to
meet the changing needs of the global workforce.
The demand for knowledge whenever and wherever
it is needed is real. So how does the savvy training
professional determine if the tech-based training they provide is effective?

In this interactive webinar, Jim and Wendy Kirkpatrick will discuss how to evaluate
newer types of training, such as mobile learning, microlearning
and informal learning. Learn how to use and adapt training evaluation methods and
tools to capture and utilize the data you require to make good decisions with your
valuable training resources.

You will come away from this webinar with an understanding of how to:

- Assess if a certain type of training will be effective
- Gather meaningful data from any type of training
- Maximize training outcomes for any training investment
